

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

*Smallpox in vicinity of Naples.*

Passed Assistant Surgeon McLaughlin reports, April 29, the occurrence of smallpox at Pompeii and Bosco Tre-Case, with 1 case at the former and 3 cases at the latter place. The infection was imported from Torre Annunziata, where an outbreak was reported April 27. Measures have been taken to prevent spread. At Torre Annunziata prophylactic measures continue to be rigorously applied.

*Smallpox.*—Week ended May 2, 1907. Lucoli (Aquila), 2; Torre Annunziata, 7; Boscotrecase, 2; Pozzuoli (Naples), 1; Viterbo (Rome), 1.
